

# GI BARBED WIRE

GI Barbed wire is generally used for protection and for demarcating the border for properties and residential buildings. It consists of two strands of wire twisted together with barbs placed at a pre-determined distance (3 inches). UNIK supply GI Barbed Wire using imported GI wires from world class steel mills in India, Taiwan & China.

## SPECIFICATIONS & STANDARDS

Type of Material	Wire Diameter	Tensile Strength	Length Between Barbs	No of Nodes Between Barbs	Weight (kg)
Hot dipped Galvanized Wire	2.00 (G14)	35 - 55kg mm <sup>2</sup>	75mm	3	25.00

## ADVANTAGES OF UNIK BARBED WIRE

- Uniform thickness of wire with longer barbs at a standard distance.
- Withstands corrosion / Rusting even in harsh conditions.
- Extremely Strong and flexible.
- Compatible with every bundle for easy handling.

## APPLICATIONS OF GI BARBED WIRE

Field fence, Industry, Agriculture, Animal Husbandry, Express ways & Trees
